

Weiser River Streambank Restoration, Phase II (Weiser River CD)

Program	Watershed Restoration		
Lead Implementer	Weiser River Conservation District		
Funders	Idaho Soil and Water Conservation Commission, Local Governments, Weiser River Conservation District		
Other Organizations	Private Party		
Project Primary Contact	Jon Beals (jon.beals@swc.idaho.gov)		
Project Stage	Deferred	Duration	2020 - 2021
Estimated Total Cost	\$230,000.00	Secured Funding	\$5,000.00
No Funding Source Identified Yet	\$0.00	Targeted Funding	\$225,000.00

Natural Resource Projects & Practices > Watershed Restoration

Phase I removed a large sediment bar at the confluence of the City of Weiser intake and restored the streambank near the confluence area. Phase II is needed to prevent future erosion that is causing the issues, by working the Railroad to help at rock barbs to redirect the flow of water from the train bridge. This will prevent or greatly slow down the erosion on the south bank of the Weiser River.

No Key Photo provided

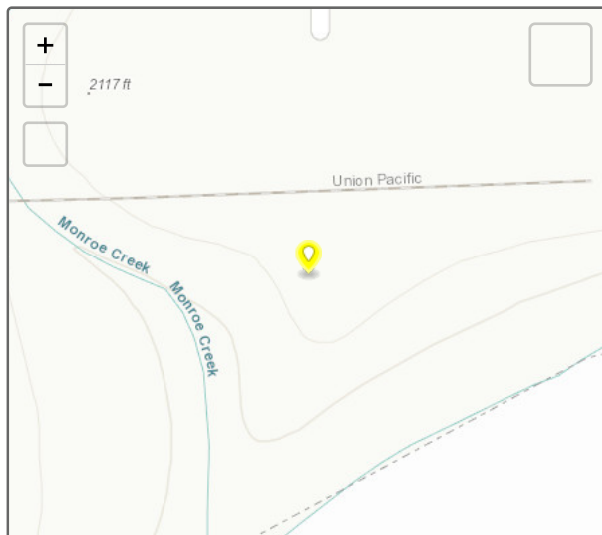

Targeted Performance Measure

- Sediment Load Reductions - Riparian

Project Themes

- Healthy Watersheds
- Water

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
